BOARD OF CONTROL

I appreciate greatly the assistance I received from the Dentists of Toronto in the campaign of last year. I will again be a candidate for civic office and trust that my record has been such as to merit continued support.

THE PRESIDENT'S GREETINGS

The work of the Academy for this season must be carried on against the background of the war. Four Senior Officers of the Academy have left the Executive to serve in His Majesty's Forces. Many of our members are also on Active Service. We must carry on without their assistance and support, and must faithfully strive, not only to conduct the immediate activities of the Academy, but also to preserve and strengthen the organization that it may be able to serve Dentistry in the changing days that surely lie ahead.

In planning the programme two objects have been kept in mind. First, to provide lectures and clinics that will add to our technical and professional resources, that we may be better able to care for our patients, and second, that association with each other will give us inspiration and encouragement and revive our enthusiasm. Thus by strengthening our skill, and our spirit, we shall be fitted to share in the resurgence of professional activity that is already noticeable.

The Academy is pleased to extend full privileges of membership to all officers of the Canadian Dental Corps, and it is hoped that they will attend our meetings, the Winter Clinic and the At-Home in large numbers.

Also we are extending an invitation to all dentists outside Toronto to attend our meetings, as our guests, whenever possible. Toronto dentists are requested to extend the welcoming hand of good fellowship to our out-of-town colleagues.

We would ask the support of every dentist in Toronto, to make the season 1940-1941 a memorable one in the annals of the Academy. Your criticism and suggestions will be thankfully received and your encouragement will be sincerely appreciated.

EDMUND T. GUEST.

“ALPHAMIN” ...

When oral health is impaired due to multiple vitamin and mineral deficiency, “Alphamin” provides a valuable supplement to the diet.

“Alphamin” is a biologically-standardized product presenting essential vitamins and minerals combined in a pharmaceutically correct manner. The fat-soluble Vitamins A, D and E are contained in soft gelatin capsules, separate from the water-soluble Vitamins B₁ and C and the minerals, which are contained in “Comprills” (soluble compressed pills).

The average prophylactic dose is one capsule and one “Comprill” daily. “Alphamin” is supplied in boxes containing 25 and 50 doses.

CAN YOU TELL THE STORY OF DENTISTRY? DO YOU KNOW—

. . that hundreds of mothers are anxious that their children have good teeth?

. . that hundreds of mothers do not know the importance of the first molar?

. . that children are impressed when a "real dentist" tells them the story of their teeth?

. . that young women want to know how to keep their teeth beautiful?

. . that hundreds of women want to know about dentures that don't look "false"?

. . that audiences are available, and that organized dentistry must supply these people with dentists able to tell the story of good dentistry — with authority?

. . that we have plenty of charts, motion pictures, slides and other aids for a good lecture?

School Dental Service—Dr. J. G. Pilkey.

Your Public Dental Health Committee has this year coupled with its usual educational work several activities which have arisen as a result of the war. We will welcome your support, co-operation and counsel in carrying on these duties.

With the coming of the present conflict a great many organizations have been active in training the public for war service. This training, in many cases, has included dental lectures which can be properly presented by members of the profession only. Your co-operation with our Speakers group and willingness to assist with these lectures not only benefits the profession but carries out a patriotic duty.

It is possible that in the coming months we may also be called upon to examine children evacuated to our shores for safety. This work is to parallel a similar service provided by our medical colleagues. The response to our requests for this type of service has already been more than satisfactory and we wish to thank the members and invite their continued support.

W. M. TWIBLE, Chairman.

Several hundred thousand Ticonium restorations have been constructed during the last five years and are still being worn. Allow us to construct your next partial in

Ticonium

Our happy experience with Ticonium during the last several years prompts us to recommend it without qualification. Ticonium is lighter, stronger, more rigid and cleaner than gold. Dentists who have used Ticonium prefer it to restorations of the more expensive metals. Patients prefer Ticonium restorations because they are more comfortable and less conspicuous and because they minimize denture consciousness.

OTTAWA

ANNUAL DINNER MEETING

Eaton's Round Room

7.00 p.m.

Monday, October 21st, 1940

Speaker:

B. K. SANDWELL

Toronto

Mr. B. K. Sandwell scarcely needs any introduction to Canadians. Editor-in-Chief of *Saturday Night*, his Editorial Front Page has long been recognized as one of the outstanding commentaries on the contemporary Canadian scene.

Recently, his discussions of Current Affairs, featured on nation-wide broadcasts by the C B C, have stamped him as one of the most influential forces in Canada working to create an informed public opinion.

Members of the Academy should not miss this opportunity of hearing and meeting this distinguished Canadian.

VERNONITE

Goes to College

In college clinics where observations of controlled full and partial dentures is highly practical over long periods, VERNONITE was first tested. Before a single unit was allowed to "go on the market" several thousand restorations were placed in the mouth and watched — were pronounced a complete success by investigating prosthodontists. Today after four years, hundreds of thousands of VERNONITE cases are being worn by pleased patients throughout the continent.

FIRST GENERAL MEETING

Osler Hall

Academy of Medicine Bldg.

Thursday, November 14th, 1940

Speaker:

WILLIAM W. HURST, D.D.S.

Cleveland, Ohio

William W. Hurst, D.D.S.; College of Dentistry, University of Minnesota, 1922; Professor of Prosthetic Dentistry, School of Dentistry, Western Reserve University, Cleveland, Ohio; Member, American Full Denture Society; Past President, Cleveland Dental Society.

Subject: "IMMEDIATE DENTURE SERVICE"

Illustrated with colored moving pictures and slides. Pre-extraction records; vertical dimension established and permanently recorded; related factors co-ordinated in plan of procedure; three types of impressions; steps in making individual water-cooled metal impression trays; two types of trimming models and setting up teeth; steps in construction of clear acrylic surgical matrices; conservative surgery; importance of maintaining occlusal balance; methods of refitting and servicing.

A PLASTIC MATERIAL
FOR REBASING
IMMEDIATE OR PERMANENT DENTURES
KONFORMAX

Konformax is a remarkable new plastic material developed by Dr. James K. Lennox, a Detroit dentist. Konformax eliminates every difficulty encountered with the rebasing material heretofore available. Konformax, while only now presented to the profession, has been used by scores of Detroit dentists for two years with entirely satisfactory results. Statements made by them will be furnished upon request.

**NO MIXING
NO BOILING
NO WAITING**

Konformax is always ready. Just squeeze from the tube and use.

SLOW HARDENING. It hardens slowly (about 2 hours), giving soft creeping tissue time to settle to normal position. Readily adaptable to tissue form—does not change position of the plate.

CUSHION & SUCTION. Produces cushion as well as suction, thus conforming to every indentation of the tissue.

LONG LASTING.—A rebase of Konformax lasts from six weeks to several months.

HEAT RESISTING. Withstands temperature up to 400°—thus, is not affected by mouth temperatures.

NON-IRRITATING. Contains no acetone. Produces no burning sensation. Can be used immediately after extraction.

COMFORTABLE. Makes temporary dentures comfortable from the start—makes permanent dentures fit more accurately. Any denture may be periodically adapted to the mouth with Konformax. Or, it may be used to great advantage in obtaining perfect impressions for new dentures.

NON SOLVENT. Konformax is not in any way affected by saliva.

INEXPENSIVE. Konformax will pay for itself in time-saving and by making relationship between dentist and patient much more pleasant during the trying absorption period between temporary and permanent dentures. There are ten or more rebasings in a \$6.25 package of six tubes.

INVESTIGATE. It will pay you to investigate at once. Ask our salesman about Konformax.

B. A. TRESTRAIL

9.00 A.M.—Registration on Main Mezzanine Floor.

9.30 A.M.—Group Clinics.

10.45 A.M.—Group Clinics.

12.15 P.M.—LUNCHEON. Mr. B. A. Trestail, Vice-President and Director of Sales and Advertising of the Canadian Radio Corporation, who is in constant demand in United States and Canada as a humorous after dinner speaker, has kindly consented to address the luncheon meeting.

2.00 P.M.—Group Clinics.

3.00 P.M.—Group Clinics.

6.00 P.M.—DINNER.

8.00 P.M.—Table clinics by dentists, dental assistants, nurses, and exhibitors.

We have been most fortunate in securing as guest speaker for the dinner meeting, Dr. Robert McClure. His subject will be: "The Closing of the Burma Road."

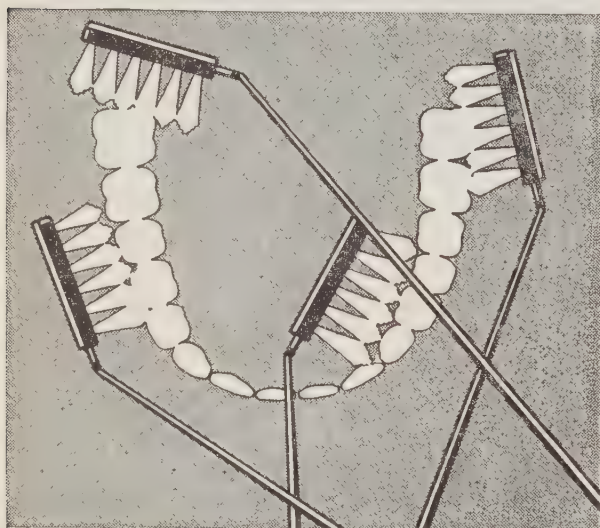

A few weeks after the Jap-China war broke out in 1937 Dr. Robert McClure was at the front line organizing hospital and medical aid for the combatants. Dr. McClure, a son of a missionary, has spent most of his life in China, and the medical organization set up by him in the East has been responsible for saving thousands of lives. The speaker's subject is of such international importance that no one can afford to miss this outstanding address.

Further details concerning these clinics will be supplied to the members on December 4th.

Exposed Surfaces of all Teeth

... reached more easily with the
SQUIBB *ANGLE* TOOTHBRUSH

PRINCIPAL advantage of the Squibb Angle Toothbrush is its design. It's bent at the "mouth-mirror" angle which makes it easy to get at inaccessible places in the mouth. It is suited to mouths of all types and adaptable to all brushing techniques.

Molars—incisors—buccal—lingual—occlusal surfaces are all within easy reach of the brush-head with the Squibb Angle Toothbrush.

The Squibb Angle Toothbrush is a brush you will like to use yourself—one you will be pleased to recommend to your patients.

**The Forgotten Tooth Becomes the Remembered
Tooth with the SQUIBB Angle Toothbrush**

For further information write 36 Caledonia Rd., Toronto

E·R·SQUIBB & SONS OF CANADA, Ltd.
MANUFACTURING CHEMISTS TO THE MEDICAL PROFESSION SINCE 1858

... cleaned scientifically
with **ENZODENT***

As indicated by the findings of Harold Keith Box, ENZODENT furnishes starch-liquifying enzymes activated and buffered to work effectively in acid or alkaline saliva.

From preliminary reports received from clinicians it would appear that ENZODENT inhibits the formation of tartar, liquifies ropy saliva, keeps bar dentures bright and clean, and brings patients back to the dentist's office with mouths far cleaner than usual.

ENZODENT is supplied in powder form for home use as a dentifrice or a mouth wash, and is now available on prescription.

ANNUAL WINTER CLINIC

GROUP CLINICS

This year all the group clinics will be conducted by Toronto dentists. Each clinician has set forth a group of practical questions which will be fully discussed in the clinic.

FULL DENTURES

DR. R. S. WOOLLATT

Dr. Woollatt will show a coloured motion picture on the Fournet Tuller technique of constructing dentures. This excellent picture has been made available to us through the kindness of the Cosmos Dental Products, New York.

PRACTICAL EXODONTIA

DR. J. H. JOHNSON

Questions

1. What should be the attitude of the dentist toward roots in the antrum?
2. When is surgical removal of the frenum indicated and what is the surgical technique?
3. What fundamental principles should be observed in the raising of mucoperiosteal flaps?
4. What is the dentist's responsibility regarding adamantinomatata?
5. What factors are involved in the treatment of cysts involving the developing permanent dentition?
6. What suture materials are suitable for use in the mouth?
7. When is the splitting of teeth with chisel and mallet indicated?
8. What might be considered an adequate armamentarium?
9. What is the prognosis of injury to the mandibular or mental nerve?
10. How may post-operative infection best be avoided following extraction?
11. What is the surgical treatment of high muscle attachments in the edentulous mouth?

CHILDREN'S DENTISTRY

"The Consideration of Some Phases of Diagnosis and Treatment of Anterior Teeth Injured During Childhood."

DR. R. G. ELLIS

Questions

1. What is the normal anatomy of the teeth and their enveloping structures in the child during the ages most susceptible to injury to anterior teeth?
2. Is it always necessary to restore tooth structure lost as the result of fracture?

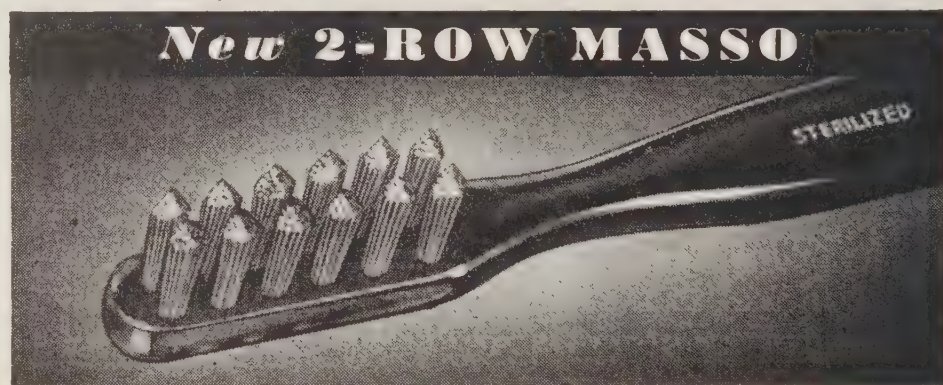

Now! **3 MASSO** **TOOTH BRUSHES** to choose from

18 knots of selected quality genuine bristles, bleached, hard and medium textures.
 "The Dental Profession's Standard."

18 knots of extra choice quality genuine bristles, unbleached, hard texture.
 Lasts much longer!

A still smaller brush, with only 12 knots of extra choice genuine bristles, unbleached, hard texture. For greater effectiveness in gum-massaging!

 245 CARLAW AVENUE - TORONTO, CANADA

ANNUAL WINTER CLINIC

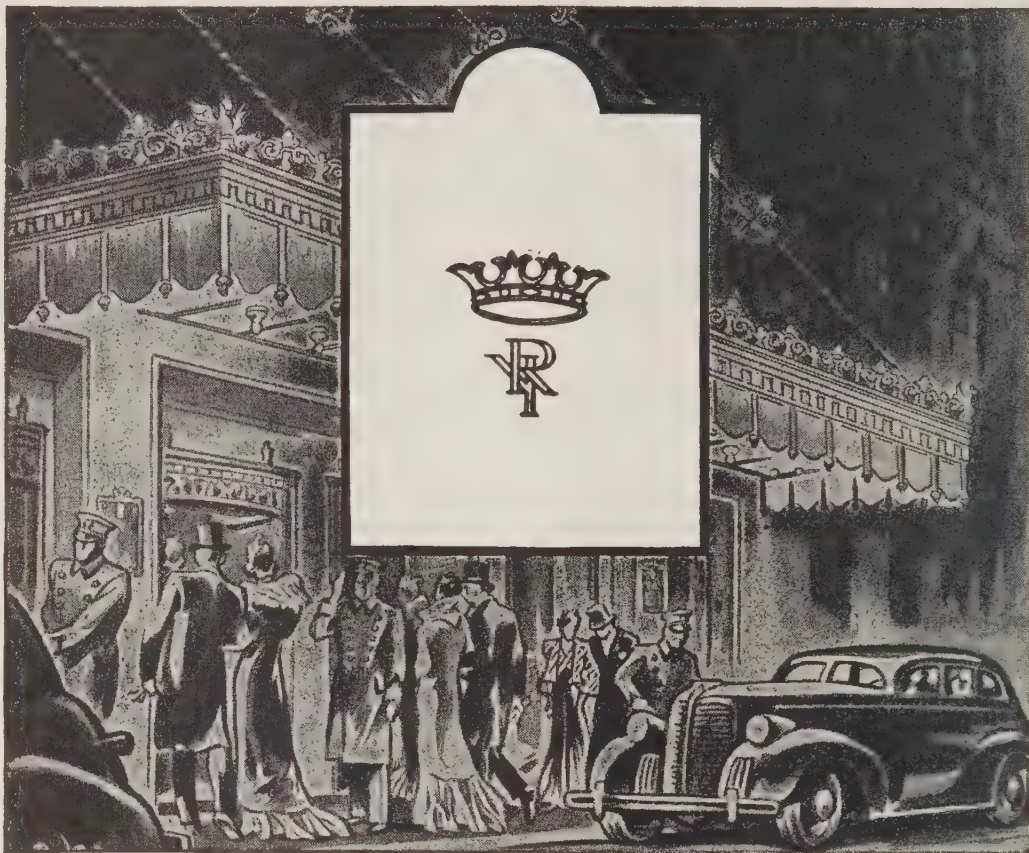

3. If a restoration is required, what age must the child be before consideration can be given to a more permanent restoration?
4. What is the procedure when the pulp is exposed?
5. Is root canal therapy successful in cases of fracture involving the pulp?
6. What can be done with a tooth partially dislodged from its socket?
7. What is the prognosis of the tooth in the case where the root is fractured?
8. Can we use the natural crown as the restoration?
9. What is the prognosis of the case of the child whose deciduous teeth are injured?
10. What possible sequelae may follow later in life, even if at the time of injury the tooth may remain alive and normal?

ORTHODONTIA

DR. C. A. CORRIGAN, DR. VERNON FISK, DR. S. S. CROUCH

Questions

1. What advice should a dentist give to parents regarding their child's thumb sucking habit?
2. Do orthodontic appliances cause—
 - (a) dental caries?
 - (b) root absorption?
3. Is orthodontic treatment contra-indicated in a nervous child?
4. What is the responsibility of the general practitioner in supervising the growth and development of the jaws and teeth?
5. What types of cases of malocclusion may be too complicated for treatment by the average general practitioner?
6. In what cases is the extraction of bicuspidis advisable?
7. What is the proper age to start orthodontic treatment?
8. What should be the role of the laboratory technician in orthodontic treatment?
9. When and where is a space maintainer indicated?
10. What are the common causes of malocclusion and facial deformities?

Some Outstanding Impressions **of A GREAT HOTEL**

The suave rhythms of the Royal York dance orchestra, playing for the nightly supper dance . . .

The dignity and grace of the Imperial Dining Room . . .

The quiet informality of the Venetian Café . . .

The remarkable sense of intimacy obtainable in the well-appointed rooms set apart for private dinner parties and other social entertainments . . .

The restful quiet of the bedrooms, with all their modern luxuries and conveniences, including bath and shower, radio and telephone . . .

The equable temperature and airiness of the entire spacious building . . . (All public rooms and spaces are air-conditioned.)

LARGEST IN THE BRITISH EMPIRE

Distinguished as one of the great hotels of the continent and the largest in the British Empire, the Royal York meets the highest international standard of cuisine and service.

ANNUAL WINTER CLINIC CONDUCTION ANAESTHESIA

DR. W. B. AMY

Questions

1. What type of needles and syringe are best suited for the purpose?
 2. Is psychology a potent factor in its use?
 3. What is an efficient method of preparing and injecting into the tissues?
 4. How would you make injections for the removal of the upper teeth?
 5. How would you make injections for the removal of the lower teeth?
 6. What method would you employ to ascertain whether your anaesthesia was perfect?
 7. Why is it that a mandibular injection does not necessarily remove all pain in the extraction we will say of a first Lower Molar?
 8. How would you make injections for the removal of an abscessed tooth?
 9. Does speed of injection bear any relation to toxicity and post-operative pain?
 10. Why are hypodermic needles broken in injections?
 11. What is the most efficient method of injecting for cavity preparation?
 12. How would you treat a patient showing signs of syncope?
- Illustrated with colour slides.

RADIOGRAPHY

“The Significance and Insignificance of Certain Dental Roentgenological Findings.”

GEORGE A. MORGAN, D.D.S.

Questions

1. Should teeth be removed solely because of pulp stones or hypercementosis?
2. Can you roentgenologically differ between an abscess, a granuloma or a cyst?
3. Should retained deciduous root tips be removed?
4. Should the dentist interfere in the treatment of hypertrophies, benign or malignant?
5. How would you locate retained maxillary roots including those involving the antra?
6. Do you use a reducing solution?
7. Is the dry socket in your office a difficult post-operative problem?

2. Does the pin inlay make a satisfactory
 - (a) Inlay?
 - (b) Bridge Abutment?
3. Which is more desirable, the cast pin or soldered pin inlay?
inlay?
4. What is the best method of securing an impression for an indirect inlay?
5. Is there any difference in the type of band used in taking an inlay impression?
6. How is the bite and contact point of a compound inlay obtained in carving the wax pattern without mounting in articulator or checking in the mouth?
7. What is a simple and practical method for making direct inlays?
8. Is there any procedure in investing wax patterns which will simplify the casting process?
9. What are the most desirable investments?
10. What rules might be followed which would aid in the casting process?

S. S. WHITE

Zinc Cement Improved

Entirely new formulae

Distinctly improved in every respect

The indisputable evidence revealed in many months of laboratory research, innumerable tests, and practical applications, impels us to state without hesitation that you will find S. S. White Zinc Cement Improved distinctly superior to any zinc oxyphosphate cement that you have used heretofore.

Reducing the colors to four is an accomplishment in itself, made possible by our experience in developing Filling Porcelain Improved colors, the practicality and esthetic values of which are acknowledged by all who have used this remarkable material.

Great Strength
Dependable Retention
Impermeability to Oral Fluids
Low Film Thickness
Only Four Colors
(Pure White, Tooth - Yellow,
Incisal Gray, Gingival-Brown)
Smooth Mixing
Cool Setting

NOTE: Bottles of S. S. White Zinc Cement Powder Improved never contain less than 32 grams. Liquid bottles contain 20% more liquid than is required for one bottle of powder.

SECOND GENERAL MEETING

Osler Hall

Academy of Medicine Bldg.

Wednesday, January 15th, 1941

Speaker:

JOHN C. BRAUER, D.D.S., A.B., M.S.

Iowa City

Dr. Brauer has addressed over 200 audiences at national, state, and district meetings, as well as having conducted many post-graduate courses in dentistry for children. He has also written a textbook "Dentistry for Children".

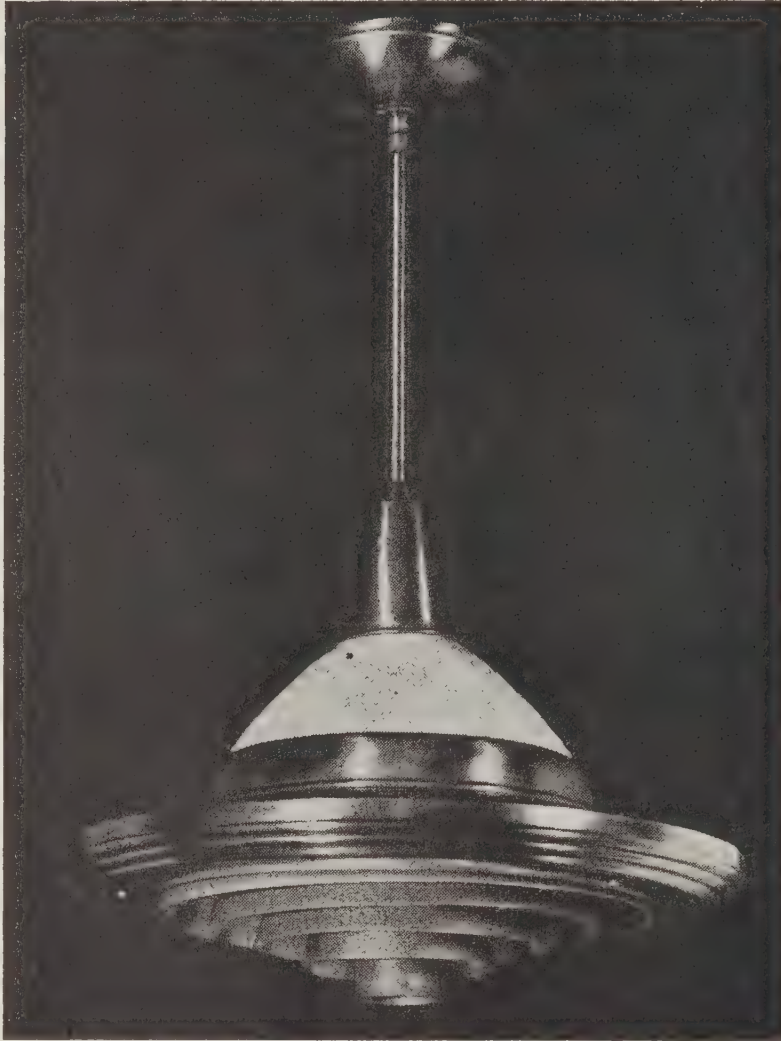

Subject: "THE CHILD IN YOUR PRACTICE"

Afternoon Session—

The speaker will discuss problems of child management, an adequate examination of the child patient, as well as the fundamentals of cavity preparation as they apply to the deciduous and young permanent teeth. In addition to this there will be also considered the problems of treatment and restoration of the fractured permanent central incisors.

Evening Meeting:

This will be a discussion of the fundamentals of space retention in the event of early extraction or loss of the deciduous teeth, and the many problems concerned. Also the fundamentals of nutrition as they apply to dentistry.

A new non-glare Lighting Fixture for the Operating Room. It is good looking and properly distributes sufficient light to the Cabinet, Operating Table, Sterilizer, etc. If properly placed it also becomes suitable for Oral illumination.

Price \$17.50
(Subject to change)

In ordering give ceiling height.

"A PLANT OF SLOW GROWTH"

"Confidence," remarked William Pitt, "is a plant of slow growth" First voiced in 1776 this is a sentiment that gains in wisdom in this age of sudden development.

In over forty years association with the Canadian dental profession, Ash-Temple's ideals have won that kind of confidence . . . the trust and reliance that can only be earned by a record of proven service.

As a dental surgeon, your investment in equipment is a major consideration. You naturally desire modern furnishings, precision instruments and high quality working materials. So, too, do your patients. Whether you are at present interested in new installations, supplies or repair work, the Ash-Temple organization offers you a complete service which enjoys the fullest confidence of the profession from coast to coast.

FOURTH GENERAL MEETING

Osler Hall

Academy of Medicine Bldg.

Thursday, March 13th, 1941

Speaker:

ARNE F. ROMNES, D.D.S.

Chicago, Ill.

Arne F. Romnes, D.D.S. graduated from Northwestern University Dental School 1931; Master of Science in Dentistry 1937; Instructor in Prosthetic Dentistry 1931-33; Instructor in Operative Dentistry 1933-37; Assistant Professor of Operative Dentistry 1937- .

Subject: "PRACTICAL SUGGESTIONS IN THE USE OF AMALGAM"

Amalgam is being recognized as one of the better permanent restorative materials. Modifications in cavity preparations are suggested to suit its physical properties and manipulative peculiarities, and the application of a suitable matrix is imperative in order to secure the best results with amalgam. The relative merits of the manual and mechanical methods of condensation will be evaluated. Colored motion pictures and slides will emphasize the important clinical factors from cavity preparation to completed restoration.

CONSTITUTION OF THE ACADEMY OF DENTISTRY AS REVISED IN 1940

ARTICLE 1—NAME

The name of the organization shall be "The Academy of Dentistry Toronto".

ARTICLE II—OBJECTS

Objects of the Academy shall be:

1. Advancement of the Art and Science of Dentistry.
2. To promote the highest ideals of dental practice.
3. Cultivation of harmony and good-fellowship among its Fellows, and among the members of the dental profession generally.
4. The fulfilling of the obligations of dentistry in relation to the public.

ARTICLE III—MEMBERSHIP

1. Any Licentiate of Dental Surgery, residing in Ontario, and in good standing, may make application for membership.
2. Any Licentiate of Medicine or Surgery, residing in Ontario, and in good standing, may make application for membership.
3. All applications for membership shall be subject to the approval of a majority of the Executive Council.
4. Membership shall be permanent, unless terminated by resignation, or suspension for non-payment of dues or unprofessional conduct. (Suspension for non-payment of dues becomes automatic if in arrears after December 31st of the current year.)
5. Members of more than three years continuous good standing in the Academy who are obliged to resign, or become subject to suspension for non-payment of dues, because of sickness or difficult circumstances, may remain members without dues, at the discretion of an unanimous favourable vote of the Executive Council.
6. Honourary Members, and Honourary Life Members, may be elected by the Academy Members by a majority of those present at a general meeting.
7. The fee for Life Membership shall be One Hundred Dollars.
8. Members of the graduating class of the current year, resident or practising in York County, shall be granted full membership privileges without the payment of dues for that year.

ARTICLE IV—OFFICERS

1. The officers shall be President, Past-President, President-Elect, Secretary and Treasurer, to be elected as hereinafter provided. The duties shall be those generally assigned to such officers.
2. Any vacancy occurring in the list of officers shall be filled at once by the Council.

ARTIVLE V.—COMMITTEES AND DUTIES

1. (a) The Council shall consist of the Officers, the Chairman of the Public Dental Health Committee and five other Fellows, to be elected each year as hereinafter provided, for a term of one year.
(b) The duties of the Council shall be to arrange the programme for the meetings; to provide the organization of the different sections; to conduct the business of the Academy and to report at meetings.
2. At its first meeting the Council shall appoint from the Academy membership a Public Dental Health Committee, of as many members as it may deem wise, having regard to experience and availability, and adequate representation of the five Academy Districts. The Council shall select the Chairman, who shall become a member of the Executive Council during his term of office.
3. The newly elected Council shall take office on the first of May succeeding the election.
4. "That the financial year be from the First of May in each year to the Thirtieth of April of the succeeding year."
5. A chartered accountant shall be appointed at a general meeting of the Academy, each year, to audit the Treasurer's books before they are passed on to his successor.
6. An audited financial statement of the year ending April 30th, shall be made available to each member not later than October 30th of the same year.

ARTICLE VI.—MEETINGS

1. Meetings shall be held in October, January and March, and at such other times as may be arranged by the Council.
2. Special Meetings—May be called by the Council at any time.
3. Sections—Each section shall meeting at such times as may be agreed upon by the members of the Section.
4. Any physician or non-resident dentist may attend any meeting of the Academy, or of a Section, as a guest of a Fellow. In other cases, the permission of the President must be obtained, except as provided in Article VIII, Section 6.

ARTICLE VII.—FINANCE

1. The annual dues of the Academy shall be Ten Dollars.
2. Grants may be made to the recognized component societies, on a per capita basis, and of such amounts as may be determined by the Council from time to time.
3. The following sectional or district societies are recognized as components of the Academy of Dentistry, Toronto:
 - The Toronto East Dental Association;
 - The Association of Downtown Dentists;
 - The Toronto Central Dental Association;
 - The North Toronto Dental Society;
 - The West Toronto Dental Society;
 - The Mount Sinai Dental Society.

ARTICLE VIII.—STUDY GROUP SECTIONS

1. Sections shall be organized when a sufficient number of the Fellows make application to the Council.
2. The Council shall arrange for the organization of each Section.
3. Each Section shall elect a Chairman and a Secretary.
4. The Chairman of each Section shall report to the Council on the work of the Section.
5. The Council shall have general oversight of the work of the Sections.
6. Any Dental Technician may attend the meetings of a Section only on the invitation of the Section, and shall be liable for the fee of the Section, but he shall not be a Fellow of the Academy.
7. The Section Fee must be paid to the Section Secretary not later than the second meeting of the Section.
8. No one shall be accepted as a member of a Section (except as provided for in Section 6), without presenting his ticket of membership in the Academy for the Session.

ARTICLE IX.—ELECTORAL DISTRICTS

District No. 1—East Toronto—All East of the Don.

District No. 2—Downtown Toronto — Carlton and College (both sides), and all south between Dufferin St. and the Don.

District No. 3—Centre Toronto—Bloor St. (both sides), and all south to Carlton and College Streets from Dufferin Street to the Don.

District No. 4—North Toronto—All North of Bloor St. between Dufferin St. and the Don.

District No. 5—West Toronto—Dufferin St. (both sides), and all West.

ARTICLE X.—ELECTIONS

1. At the January meeting, an Elections Committee of three members shall be appointed by the Academy.
2. Not later than the first of February in each year, the Secretary shall send to each member:
 - (a) A list of Fellows—arranged according to districts.
 - (b) A list of the Offices.
 - (c) A blank nominating paper.
3. Each Fellow, with the written consent of the Nominee, may nominate one member for each office, and one representative from his District as Councillor. No Fellow to be nominated for more than one office.
4. The Nomination papers must reach the Secretary not later than the tenth of February in an envelope marked on the outside "Nomination Paper".
5. On the eleventh of February, the Secretary shall place the Nomination Envelopes received, still sealed, in the hands of the Elections Committee.
6. The Elections Committee shall open the envelopes, make a list of these nominated and in cases where sufficient names have not been submitted to ensure an election, may make further nominations for any or all of the offices. Within five days they shall send to the Secretary a list of all nominations.
7. Not later than the first of March, the Secretary shall send to each Fellow a ballot containing the names of those nominated for President-Elect, Secretary, and Treasurer, and a separate ballot for Councillor in his District. The election to be carried out according to regulations laid down by the Academy Council providing for secrecy of the ballot and limitation to members only.
8. The voter shall mark only his first choice on the ballot for each office and Councillor for his District.
9. Ballots shall be returned to the Secretary not later than the fifteenth of March.
10. Not later than the eighteenth of March the Secretary shall send the Ballots to the Elections Committee.
11. The Election Committee shall notify the Council of the results of the elections within four days of receiving the ballots.
12. The original voters list, as checked by the Elections Committee, shall be posted at the meeting at which the elections are announced.

ARTICLE XI.—CHANGES

This Constitution may be altered at any General Meeting, by a two-thirds vote of those present and voting, if the proposed change has been included in the notice of the meeting.

REPORT OF ECONOMICS COMMITTEE

At the request of the Executive Council of your Academy, the Committee on Economics was instructed to carry on with the work from the place where the 1939 Committee ceased its activities.

After careful consideration of many different means, it was decided that the best method of serving the Dentists of Toronto would be to help solve some of the economic difficulties expressed by Toronto Dentists in the questionnaire of the preceding year, and also take advantage of opinions expressed on how organized Dentistry can help the Toronto Dentist.

In the main the economic difficulties expressed in the questionnaire are:

1st—Collection of Accounts.

2nd—Not enough patients who can pay for good dental service.

With these problems in mind, your Committee solicited and obtained the co-operation of the officers of the various district societies, with the idea in mind that by working together we might be able to partially solve some of these economic problems.

As a result of these conferences, and with the help and endorsement of the Academy Council, and with the active aid and co-operation of the local societies, it is the intention of the Committee to conduct this Fall extensive study groups in the following subjects:

1. Personnel and personality of the Dental office.
2. Patient education.
3. Bookkeeping.
4. Gross and net incomes.
5. Credit and collections.

The above divisions of subject matter are subject to such modifications as experience may suggest.

It is the wish of your Committee and all those responsible for these courses that all the Dentists of Toronto take full advantage of these facilities to better themselves in respect to the conduct of their offices, from an economic and business aspect. As a result of these courses, we may in the future render better service for more and more appreciative patients, and that we may, as a consequence, receive a fair and just remuneration for services rendered.

These classes are free to all Toronto Dentists. The only stipulation is that each must be a member of one of the district societies or the Academy of Dentistry.

Your Committee considers it an honour to have been entrusted with the task of carrying on the work of the Committee on Economics for the past year.

Respectfully submitted,

ECONOMICS COMMITTEE.

STUDY GROUP SECTION

It was thought advisable this year to have fewer study groups and thus have them all well attended. Four study groups are to be formed and the clinicians have been selected. It was felt that by doing this, the groups could be organized better and an earlier start made. In each course, the subject will be thoroughly covered, making it a complete post-graduate course.

An outline of the courses is given. This is a guide and may be changed to suit the wishes of the group members.

The regulations governing study groups are as follows:

1. Any ten members wishing to take special study in any subject will be provided with a clinician by the Academy.
2. A fee of \$5.00 is payable to the Treasurer of the Academy and must be paid on the formation of the group.
3. No group will be formed with less than ten members.
4. Each member of the group must be a member of the Academy.
5. All clinicians must be acceptable to the Academy Council.
6. Each group will elect a Chairman and Secretary.

PERIODONTOLOGY

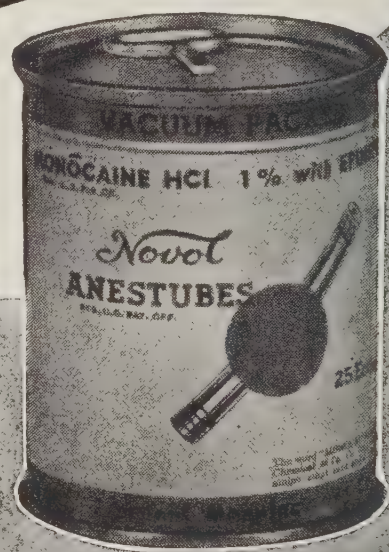

Clinician—Dr. Charles H. M. Williams

The plan of this course is based on a desire to teach simple and practical procedures in the examination and treatment of the most frequently encountered periodontal lesions. The meetings will consist, therefore, of a series of demonstration clinics on patients under treatment.

The main topics will be as follows:

*That's all
you need!*

From Monocaine HCl users all over the world comes unanimous agreement — here, at last, is a single local anesthetic — a single formula — that may be used on all types of patients — anemics, arteriosclerotics, the young and the aged. Also for all types of work . . . extractions, extensive surgery, cavity preparations, etc.

Because Monocaine HCl is a slight vasoconstrictor itself, smaller quantities of epinephrin may be used for deep, profound anesthesia. Because Monocaine HCl rarely causes a drop in blood pressure, it is free from the “jittery” reaction frequently characteristic of procaine solutions.

MONOCAINE_{HCl}

STUDY GROUP SECTION

- a. Examination—Diagnosis and choice of method of treatment.
- b. Scaling—calculus formation, types of scalers, sharpening, application.
- c. Occlusion—classification, technical procedures of correction and demonstration of correction by grinding.
- d. Pocket Surgery—methods available and demonstration of the application of each.
- e. Oral Hygiene—choice of instruments and materials and demonstration of instruction of patient.
- f. Necrotic Gingivitis—methods of treatment.

FULL DENTURES

Clinician—Dr. John A. Bothwell

This course will be a thorough study in full denture construction, using a patient, and will be of inestimable value to any dentist who makes full dentures. It will be divided into two main phases:

1. Constructing Full Upper and Full Lower dentures for a patient, using the Tuller Lower Technic.
2. Rebasing operations of all types.

ORAL SURGERY AND ANESTHESIA

Clinician—Dr. Joe. H. Johnson

This course will be of great benefit to the general practitioner and will include lectures and operating with patient. Phases of this course will include:

The MILK chosen by the guardians
of the

DIONNE QUINTUPLETS

and supplied by

City Dairy

TORONTO

Kl. 6151

STUDY GROUP SECTION

1. All types of injections with local anaesthesia;
2. Simple flap operations and suturing;
3. Simple and difficult extractions;
4. Removal of broken roots.
5. Trimming process for immediate insertions;
6. Pre-medication and control of post-operative pain;
7. Treatment of dry sockets.

INLAYS AND FIXED ATTACHMENTS

Clinician—Dr. P. G. Anderson

This course will require from six to eight sessions, and will be as much as possible demonstrated on patients and practical cases. The course will include:

1. A short review on dental anatomy to give the operator a better understanding in the use of the different hand and engine instruments on tooth structure.
2. A review of cavity preparation of simple and compound cavities for inlays and bridge abutments;
3. A few methods for inlay impressions, both direct and indirect which are simple and efficient, saving chairside and laboratory time;
4. Methods of investing, casting, polishing and insertion of inlays will all be reviewed.

TORONTO EAST DENTAL ASSOCIATION

DR. J. BEVAN KING

President

The Toronto East Dental Association anticipates another year of progress in genuine fellowship, through large membership and attendance in social and clinical functions. Last year 75% of the dentists east of the Don were enrolled.

The annual golf tournament, of city-wide interest, will be held at the Cedar Brae Golf Club on Wednesday, September 18th, 1940.

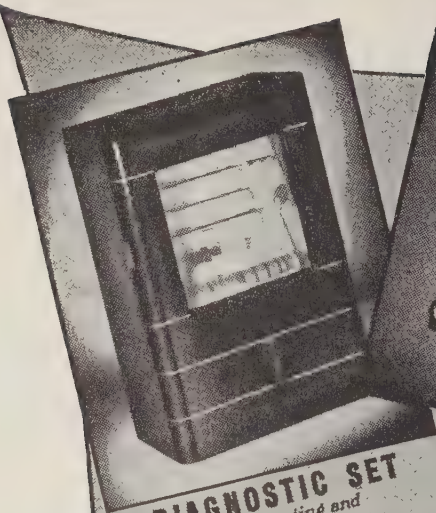

Opening Dinner Wednesday, November 6th.
Annual Turkey Roll Monday, December 16th.

Two general meetings with clinical programmes and one of special interest on a non-dental subject, will be held on Thursday, January 9th, February 6th, and March 6th in the Toronto East General Hospital. We urge members to attend these events and really become acquainted with one another.

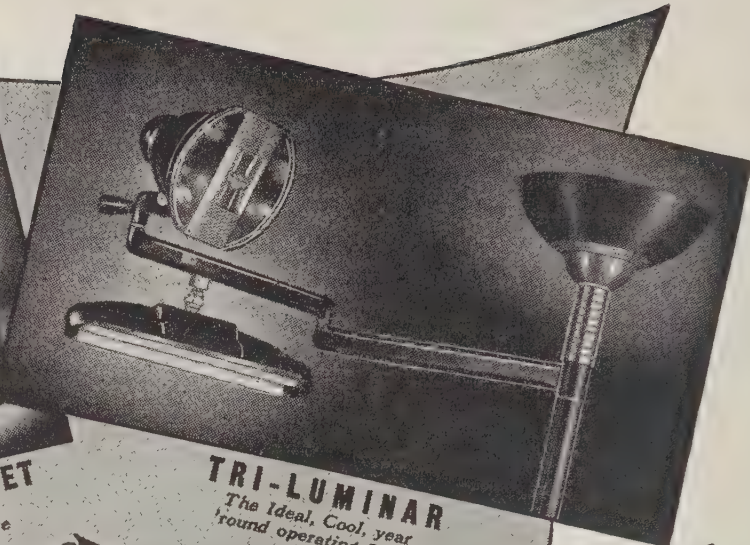

Our Association assures the Academy of our close co-operation, and best wishes for another successful season.

TORONTO CENTRAL DENTAL SOCIETY

DR. A. O. DERBYSHIRE

President

It has been the policy of this society to endeavour to develop the social and cultural aspects rather than the technical side of our profession. With this in view, we usually invite to the first meeting in November, the executives of the other Dental groups, their wives and friends. We propose to follow the same course this year.

The January, February and March meetings are, for our own members, usually complimentary dinner meetings, held in Hart House, at which we have speakers on topics of current interest, or other forms of entertainment.

Announcements of all these meetings will be mailed to those interested, previous to each meeting.

All Purpose
CASTING GOLD
with Indium

"I Have Details Enough!"

That's why I standardize on this
MODERN GOLD"

Hundreds of dentists say the same thing: There's too much detail in daily practice already. Why bother with all sorts of golds for all sorts of applications? Here—thanks to tireless metallurgy—is a casting gold that fits *ALL* types of work in the mouth...inlays, fixed bridge-work, partial dentures. It's famous for workability, too. Casts just the way you want it... gives excellent results...ends the old-time necessity of matching shades. Finishes to a beautiful light-coin color. Share in the benefits of *modern* metallurgy—always use and specify Williams "6" ALL PURPOSE... Want further details? Ask your dealer or write for literature.

NORTH TORONTO DENTAL ASSOCIATION

DR. RALPH E. MARTIN

President

The programme holds great promise of stimulating membership and of providing excellent returns both socially and educationally. The generosity and enthusiasm of our clinicians we know will again be supported by record attendance.

DR. ALEXANDER LIPSON
President

The Mount Sinai Dental Society extends greetings to the Academy and to the local groups affiliated with the Academy. A cordial invitation is extended to those who would desire to attend our meetings, which have been scheduled for the last Thursday of each month, commencing September, 1940, and ending May, 1941.

Our programme has been based upon general and scientific subjects, in particular those medical sciences so closely related to dentistry. A strong membership committee has been formed and we commence our fourteenth year with hopes for a very successful term. We will again operate the free dental clinic, at the Mount Sinia Hospital.

Our officers and members earnestly pray for the safety of our troops and for the speedy fulfillment of the war aims of the British and Canadian governments.

THE TORONTO SOCIETY OF DENTAL ORAL SURGEONS

The Toronto Society of Dental Oral Surgeons has held five dinner meetings at Hart House during the year. Matters pertaining to the welfare of this specialized group in relation to the rest of the profession were considered and suggestions for improvement were made. Work was planned and allotted for a symposium on Oral Surgery which was to be presented as a two-hour clinic at the O. D. A., in which every member would take part. Owing to the unavoidable absence of three or four men around the time of the convention it was decided to postpone the presentation to a more opportune time.

Our Society has lost from its active membership roll this year three very prominent men of the profession, Dr. Bill Kerr, who passed away early in the fall; Dr. Gordon Frawley, who joined the Active Service Force, and Dr. Aubrey Crich, who retired to his fruit farm in Grimsby.

The officers and roll of members are as follows:

President.....Dr. Murray Robb
Secretary.....Dr. William W. Breslin

The members include Dr. J. M. Cation, Dr. W. L. Chalmers, Dr. Aubrey Crich, Dr. Gordon Frawley, Dr. Frank Jarman, Dr. H. J. Johnson, Dr. R. W. Matchett, Dr. George Morgan, Dr. E. W. Paul, Dr. H. G. Robb.

THE TORONTO ORTHODONTIC STUDY CLUB

The Toronto Orthodontic Study Club is entering its twelfth season. The Orthodontic Club was honoured when its founder, Lt.-Col. H. G. Bean, succeeded Lieut.-Col. W. G. Trelford to the command of the Canadian Dental Corps in No. 2 Military District. As President of the Great Lakes Association of Orthodontists he will preside at the annual meeting to be held in Toronto, October 28th and 29th. Major Bean well deserves both honours.

Soon after the outbreak of the war the members of the club went on record as being ready to offer their services to their country in the capacity for which they are trained. This year the subject of fractures of the jaws which was commenced last year will be continued. The members have pledged themselves to continue the treatment of cases of any member of the club who may be called for military service.

The officers for the season 1940-41 are:

DENTAL NURSES' ALUMNAE ASSOCIATION OF CANADA

The Dental Nurses' Alumnae Association are anticipating another successful and interesting year. As well as continuing with their work in providing Dental treatment for 'teen age boys and girls who have graduated beyond that care supplied by the Public Schools, they will also lend their support to the Dental Corps and Red Cross. The Executive received a great deal of encouragement from the increased attendance of the dental nurses at the various activities of the past year. The meetings are held on the second Tuesday of each month.

Plans for the year's meetings will include Speakers on subjects of interest to the Nurses along with the several social activities which are a part of the Alumnae. A tentative program is as follows:

- September—Miss McKeown of the Red Cross.
- October—Mr. Frisby—Conduct of a Public Meeting.
- November—Mother and Daughter Banquet—Speaker: Dr. Willinsky.
- December—Christmas Party—Gray Coach Travelogue.
- January—Dr. W. Graham.
- February—Annual Bridge.
- March—Speaker on Occupational Therapy.
- April—Speaker on "Health and Beauty."
- May—Graduation Dinner and Dance.
- June—Annual Meeting.

THE LADIES' AUXILIARY
To
THE ACADEMY OF DENTISTRY
and
THE CANADIAN DENTAL CORPS

MRS. LEO SCHUMACHER
President

We begin a new term of activities on Tuesday, September 24th, 1940, with a luncheon at the Rosedale Golf Club.

Having just completed our first year as the Ladies' Auxiliary of the Canadian Dental Corps, Military District No. 2, we hope we have contributed, in some small degree, to the comforts and welfare of the corps.

I would like, at this time, to mention the splendid work of the officers and members of our auxiliary in connection with our war effort.

We are very grateful to the Academy of Dentistry for the splendid support and co-operation they have given us in our various undertakings and although we are doing what we can in aid of war work, we are still the Auxiliary to the Academy and as such it is always a pleasure to assist them in any capacity we can.

May I, on behalf of the Ladies' Auxiliary, wish the Academy of Dentistry every success for the coming year.

EXECUTIVE FOR 1940-41

Past President.....	Mrs. L. D. Drew-Brook
President.....	Mrs. Leo Schumacher
First Vice-President.....	Mrs. C. L. Eaton
Second Vice-President.....	Mrs. S. S. Crouch
Recording Secretary.....	Mrs. K. R. Harris
Corresponding Secretary.....	Mrs. George Covey
Treasurer.....	Mrs. H. W. Hoag
Councillors.....	Mrs. E. W. Paul
Mrs. L. M. Grose	Mrs. W. G. Trelford
Mrs. Edmund T. Guest	Mrs. Harvey Bean
Mrs. G. V. Morton

ONTARIO DENTAL ASSOCIATION

MAJOR IRA W. HAMILTON

President

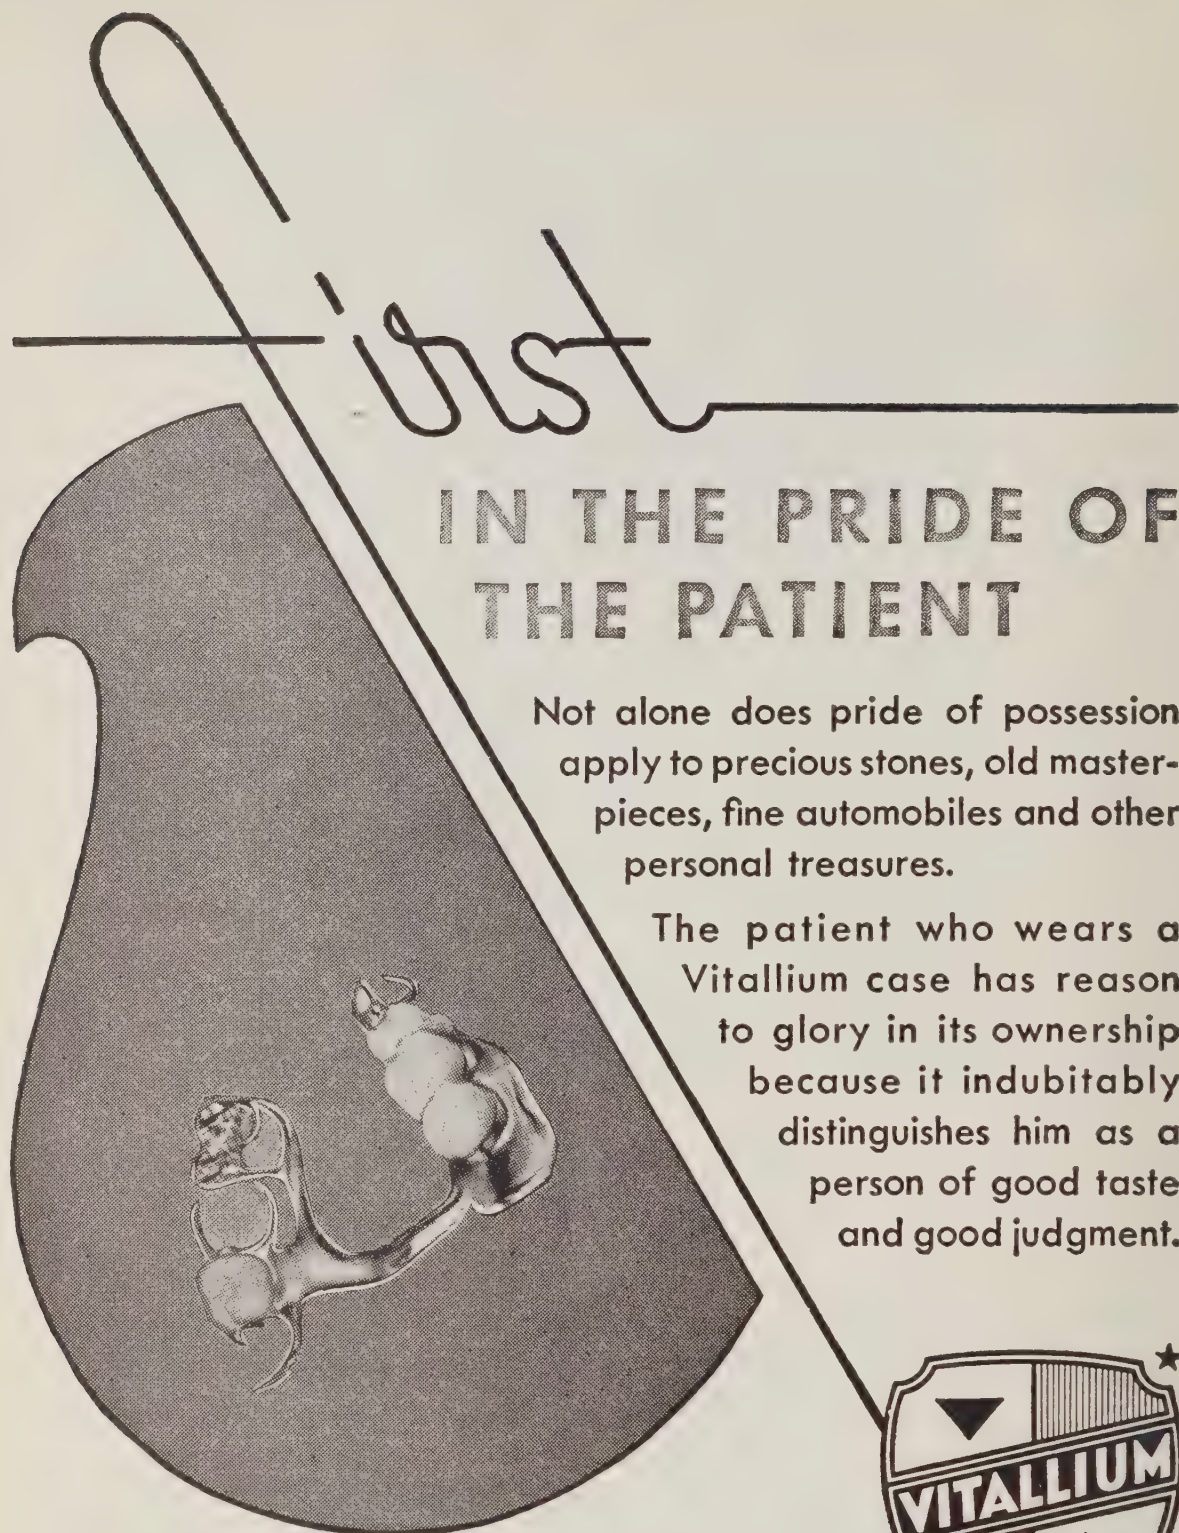

This year the privilege of extending greetings and good wishes to the Toronto Academy of Dentistry is afforded me. It is not often that a President of the Ontario Dental Association sends such greetings from a distance of over 3,000 miles. The fact that an ocean separates us makes these greetings all the warmer.

The Academy has always been a very important factor in the life of the Ontario Dental Association and has contributed considerably towards the advancement of dentistry. I know that many of its members have joined the Canadian Dental Corps but I trust that this will serve as an added incentive to the rest to continue their activities and interest both in the Academy and in the Association.

I cannot tell you very much about the plans of the Ontario Dental Association during my term of office. I can assure you, though, that it is working hard to make the annual meeting a success and for that I am very grateful to my confreres. Let us hope that by that time victory is ours and I will be present to greet you in person.

In the meantime, please accept the sincere wishes of the Association for a most successful year for the Academy.

IRA W. HAMILTON,
Major, C.D.C.

IN THE PRIDE OF THE PATIENT

Not alone does pride of possession apply to precious stones, old masterpieces, fine automobiles and other personal treasures.

The patient who wears a Vitallium case has reason to glory in its ownership because it indubitably distinguishes him as a person of good taste and good judgment.

AUSTENAL LABORATORIES, INC.

34 W. 33rd Street 5932 Wentworth Avenue
New York Chicago

In Canada Vitallium Cases are designed, cast and finished by

BOWIE DENTAL LABORATORIES

Medical Dental Building, Vancouver, B. C.

SHAW DENTAL LABORATORIES, LTD.

Regina, Sask.

CANADIAN DENTAL ASSOCIATION

DR. W. W. WOODBURY

President

What's in a name? Sometimes a very great deal. I wonder why the word Academy was selected to designate your organization. It might have been Institute, or Society, or something else. Was it the ancient lineage of the word and its philosophical associations that attracted your founders? Did those responsible for your name hope that there might be fostered among you that spirit of free enquiry and healthy doubt that constituted the particular atmosphere of the Academy of ancient Athens and its adjacent groves?

A very sound intellectual tradition is bound up with the word, the tradition of Plato and Aristotle, of logic and the foundations of western science, of straight thinking and careful observation; a tradition the cultivation of which is much needed in dentistry today.

On behalf of the Canadian Dental Association I wish you all success as you continue to make your contribution towards the development of a more effective and realistically-minded profession of dentistry.

EXCLUSIVE IN TORONTO — "INDIVIDUALIZED"

THOS. HEATH CLOTHES

CLOTHES SHOP

2 TEMPERANCE STREET

WAVERLEY 4131

1ST FLOOR UP

White Shirts *of Professional character*

in fine, lustrous
broadcloth

IMRIE BROS.

Temperance and Yonge

TORONTO

In Imrie Bros.' "Custom Quality" white shirts you readily recognize the characteristics which set them above the ordinary run. You notice the fine flexible feel of the material as it falls limp in your fingers with an utter absence of starchiness. You notice the degree of lustre, neither overstressed nor insufficient, yet remaining as long as the garment lasts. You are aware of the scientific cut of the garment, and the perfect "sit" of the collar, that simply slips into the right position in the right way—and remains there. Truly a garment for professional wear, and moderately priced at \$3.00. Other white shirts at \$2.00 and \$2.50.

GREAT LAKES ASSOCIATION OF ORTHODONTISTS

A cordial invitation is extended to the Fellows of the Academy of Dentistry, Toronto, to attend the sessions of the tenth annual convention of the Great Lakes Association of Orthodontists, October 28 and 29, with headquarters in the Roof Garden of the Royal York Hotel.

The programme will be one of special interest to each Fellow of the Academy whether your responsibility is limited only to referring cases to an Orthodontic specialist or whether you undertake the correction of cases of malocclusion of the teeth yourself.

Both the biological and mechanical phases of the subject will be discussed by the following outstanding essayists:

Dr. Allan G. Brodie, Chicago—"A critical Re-examination of Certain Orthodontic Concepts."

Dr. Bert G. Anderson, New Haven, Conn. (Yale University)—"Malocclusion in Relation to Constitutional Diseases, Mainly Rachitic Disturbances."

Dr. W. V. Watson, Toronto—"Medico-dental Problems, Particularly Those Related to Certain Deficiencies."

Dr. Fred F. Tisdall, Toronto—"The Present Status of Vitamin Therapy."

Dr. Alfred Rogers, Boston—"Myofunctional Treatment from a Practical Standpoint."

Dr. H. K. Box, Toronto—"The Maintenance of the Health of the Oral Tissues."

In addition to the above outstanding essayists, motion pictures and table clinics on many phases of Orthodontic Practice will be presented.

The annual dinner will be held at the Royal York Hotel on Monday, October 28, at 6.30 p.m. to which the Fellows are also invited.

There is no registration fee for general practitioners and specialists other than those in the exclusive practice of Orthodontics.

It is hoped that a large number of the Fellows will take advantage of this invitation. A complete programme may be obtained from Dr. S. S. Crouch, 86 Bloor Street West, Toronto.

In Memoriam
WILLIAM J. KERR

WILLIAM J. KERR

WILLIAM J. KERR, D.D.S.

By T. R. MARSHALL, D.D.S.

Among the many fellows of this Academy who, from time to time have been privileged to sit in the president's chair, no one was ever more worthy, more popular or more highly regarded than Dr. "Bill" Kerr. Everyone knew him and his colleagues greatly admired him, not only for his professional skill and ability as a dental surgeon but for what he was in himself. And so, when news of his death spread throughout our city and the countryside on December 31st, 1939, it brought grief and sorrow to the hearts of so many who knew him as a friend or had benefited from his services.

Dr. Kerr was held in high esteem because of his lovable personality, his fairmindedness and his respect for another's opinion. His sympathetic understanding always encouraged complete confidence in his judgment and ability, and his generosity and thoughtfulness knew no bounds. Throughout his long illness of 19 months, with its intense suffering, never once did he give up his genial optimism. As friends would visit him, as so many did so often, his parting assurance was, "I'll beat this thing yet."

Although finishing his course of life while yet young, Dr. Kerr served his profession with whole-hearted devotion. He was not one who sought public acclaim but rather one who wanted to do his part quietly. He was, however, for many years an executive officer of this Academy and was honoured with the presidency in 1935-36. He was actively interested in the welfare work of the Academy and gave freely of his time and services in furthering this humanitarian project. Put perhaps his greatest contribution to dentistry was made privately to individual colleagues who sought his help and encouragement. No one ever approached him and did not profit from the contact. He was an enthusiastic sportsman, fond of the great outdoors in the companionship of his friends. Regions about Southampton and Georgian Bay were always dear to his heart. He was particularly fond of children and children reciprocated his kindly recognition. On one occasion when he was most seriously ill, the children in the neighborhood of his home, all on their own volition, gathered together their pennies and sent him flowers, "Hoping he would soon get well."

Much more could be written of this kindly Christian gentleman but withal it is difficult to express the feelings of our hearts. All of us who knew him feel very sad to think we are not to see him again.

But he is not dead, he still lives in our memory.

SECRETARY'S REPORT FOR THE YEAR 1939-1940

During part of the past Academy season it was necessary to carry on without the presence of three of our officers and a number of members, on active service with His Majesty's Canadian Forces. The absence of the President, Lt.-Col. W. G. Trelford, the President-Elect, Captain R. W. Hoffman, and the Chairman of the Public Dental Health Committee, Captain Glenn Mitton, was a real handicap in the conduct of the affairs of the Academy. The serious effects of this handicap were, however, mitigated to a considerable degree by the fact that each of these officers had his work so well in hand, that it only remained for the other members of the Executive to carry out the arrangements made. And indeed, we are very grateful for the time and energy spent in the Academy's services by these officers after they were in the service, up until they proceeded overseas.

Thanks is due the Past Presidents for their ready help at all times, in presiding over meetings, and assisting with the work of the Executive.

The Good Fellowship Night held at the Granite Club on October 5th was a very enjoyable event that was not supported by the attendance of the members as it should have been. Either there was a widespread misunderstanding of the nature of this function, or many dentists lack the inclination or the opportunity to join with their colleagues in "a night out." This is to be regretted.

Lack of support by attendance of this event is the reason why it has been omitted from the programme for 1940-41.

The regular meetings were well attended, and the various essayists were well received. One speaker, Dr. L. R. Main, made such a favourable impression that he was invited by the Ontario Dental Association to return to Toronto in May of this year.

The Annual At-Home, held at Simpson's Arcadian Court, under the chairmanship of Dr. Lloyd Stirling, was an outstanding success. This delightful event is earning an increasingly important place on the list of notable functions of Toronto's social season.

The work of the Public Dental Health Committee was handicapped by the absence on active service of the originally appointed Chairman, but an able successor was found in Dr. W. Meredith Twible, and the year's work produced much real achievement. Much of the work of the Committee was carried out in co-operation with the Public Dental Health Committee of the Ontario Dental Association and our appreciation is expressed for this assistance.

Many speakers were supplied for the Home Nursing Classes of the Red Cross, Home and School Association and other groups. This activity was improved and facilitated by the organization of a speaker's group, which under its own officers studied the art and practice of preparing and delivering Dental Health Lectures.

It is to be regretted that the Civic Fathers of the City of Toronto found it necessary to discontinue the financial support of the Public Dental Clinic for Indigents, which had been operated as a co-operative enterprise by the Department of Public Health and the Academy. The closing of the Clinic leaves a gap in the Public Health structure of Toronto that will surely have harmful results.

The Economic Committee continued their study of the economic status of the members of the profession in Toronto, and made considerable progress in developing a Special Study Group on Practice Management. This work will be brought to practical achievement during the coming season.

The business affairs of the Academy were carried on by the Executive Council as provided by the Constitution. Sixteen meetings of the Executive were held besides a large number of Committee and Group meetings.

The Officers and the Council wish to express their appreciation of the help given so freely by so many of the members, and also their thanks for the understanding indulgence that has been extended to our shortcomings.

All of which is respectfully submitted.

EDMUND T. GUEST,

Secretary, 1939-1940.

TREASURER'S REPORT

Auditors' Certificate

We have prepared the attached Balance Sheet of the Academy of Dentistry as at 30th April, 1940, together with a Revenue and Expenditure Account for the year. Subject to the following report, we hereby certify that in our opinion the attached Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Academy's affairs at that date according to the explanations and information given us, and is as shown by the books.

We report upon the various Balance Sheet items in their order as follows:

Your Treasurer, Dr. S. A. MacGregor, has certified that all known liabilities to 30th April, 1940, have been paid, and that there were at that date no guarantees or contingent liabilities outstanding.

GRAY, TESKEY AND HILL,
Chartered Accountants.
